In the seminar "Career and Employment Opportunities in USA, UK, Canada, New Zealand, Ireland, and Australia," attendees were provided with information regarding career prospects, employment opportunities, universities, exams, and required documentation to pursue a career in these countries. During the seminar, participants learned about the educational landscape, exam requirements, and paperwork necessary to succeed in an international career.

It was emphasised that universities need to be chosen based on the chosen field of study. Speakers discussed prominent universities in each country. It was noted that universities play an important role in building networks and acquiring industry-specific knowledge. The discussion also mentioned scholarship opportunities for international students. Furthermore, they discussed standardised tests for admission, such as the GRE, GMAT, TOEFL, and IELTS. Attendees gained valuable insight into managing finances during study, working post-study, and engaging in part-time work while maintaining academic commitments. In the end, they had one-on-one sessions, country-by-country, to meet attendees' specific needs, provide personalised advice, and provide a roadmap to international success.

Significance of the Event :

The seminar greatly enhanced attendees' knowledge and awareness of career and employment opportunities in several countries, enabling them to make educated decisions and prepare them for successful academic and professional pursuits.

Level of the Event : College Level

Date : 03-11-23

Name of the organising Society : The Placement Cell, Maitreyi College

Name of the convenor of the event : Mr. Ginmunlal Khongsai

Resource Persons : Mr. Saurabh Parmar

Total Number of the participants : 66

Number of participants from college : 66

Report :

In the Webinar, “Marketing career trends in age of AI”, attendees were provided with information regarding how AI is taking over the world of marketing and economical jobs in our society. During the webinar, participants learned about how artificial intelligence can do jobs in 4-5 minutes when it can take 2-3 hours for a person to complete a task, and ai can become a game-changer when it comes to building a successful brand.

During the Webinar, Mr. Saurabh took the audience on the journey of artificial intelligence changing the world of marketing in recent times and how it can affect people's careers in the future. On the upside, AI can be incredibly rewarding when you're building a brand for fast working, exceeding your targets, etc... It's a dynamic field that offers opportunities for growth and financial success. However, there are also challenges that come with the territory. Artificial intelligence is taking over so much that people are losing jobs as the computer can provide the same data in minutes when it will take hours for a person to complete it. At this stage of marketing the AI is only manually involved but it is feared that it can take over completely. One notable feature of the seminar was its interactive nature, how Mr. Saurabh made sure to ask questions to everyone present in the webinar, fostering interest and creating a dynamic learning environment.

Significance of the Event :

The seminar amplified participants' knowledge about artificial intelligence in marketing and learned about the pros and cons of AI being involved in building brands and the marketing industry as a whole.

These videos are then uploaded and made visible exclusively to recruiters aligned with the student's interests for privacy reasons. A live demonstration of the process took place during the seminar, with students grouped into 3-5 individuals, actively encouraged to create their own 45-second video resumes, proving highly advantageous for the participants.

The speakers for today's seminar, Mr. Bhavesh Sharma and Mr. Akhilesh Kumar, were exceptionally motivating and helpful. Their presentation was characterized by a friendly and engaging delivery, particularly in elucidating the features and benefits of their app. In summary, the seminar was a resounding success, providing valuable insights and practical experience for the attending students.

Significance of the Event :

This seminar facilitated the enhancement of students' abilities to present themselves effectively to recruiters of the next generation, particularly through the utilization of video resumes. Additionally, the DayZero startup experienced the advantage of an expanded outreach.

The visit saw the active involvement of 23 enthusiastic students, led by the college's convenor, Mr. Ginmun Lal Khongsai. This endeavour was significantly bolstered by the presence of SRM University's representatives, who not only ensured the seamless operation of computer labs but also extended their support for any technical needs. In parallel, HR professionals from Accenture were on hand to guide students through the cognitive test, ensuring that the examination process was not only smooth but also highly efficient. As an additional feature, students were offered the opportunity to attempt the cognitive plus test, which encompassed a diverse range of subjects, including MS Office, Fundamentals of Networking, Pseudo code, and more.
